## SPILL CONTROL PROGRAM

The SafetyApplied™ Spill Control Program from DayMark Safety Systems and Public Health Innovations offers a highly effective way for restaurants and other retail food service establishments to protect employees and customers from the harmful norovirus and other diseases. The program includes highly-absorbent spill pads as well as a personal protective equipment (PPE) kit that can help reduce the dangers that bodily fluid spills present when proper and immediate action is not taken.

## SPILL CONTROL PROGRAM

### Absorbent Spill Pads

At 8.5 times the absorbency of the leading brand, SafetyApplied Absorbent Pads are an efficient and effective way to deal with common spills. While ideal for the clean-up of vomit or blood, the large 21.5" x 24" pads can also be used to clean up general liquid spills in both front-of-house and back-of-house situations.

### Personal Protective Equipment (PPE)

A more comprehensive option, the SafetyApplied PPE Kit contains critical items needed to remove and neutralize the effects of a bodily fluid spill. Also included with the kit is a list of procedures that — when followed precisely — greatly reduce the risk of contamination.

### Safety Applied™ Spill Cleanup Kit

Kit Contains:

Two bags, each containing 1 disposable apron, 1 disposable gown, 1 pair of shoe covers, 3 pairs of vinyl gloves, 1 combination mask/face shield, 3 yellow trash bags, 3 twist ties, 1 yellow absorbent pad, 3 disposable towels, instructions

Description	QTY	Item #
