

AUTOMATION FOR A BETTER, SAFER KITCHEN

The MenuPilot® application, coupled with streamlined corporate management of menu data via the MenuCommand® web portal, reduces dependence on hardware and increases emphasis on platform. Together, these facilitate the centralized management and communication of critical menu data and training materials to foodservice operations. DayMark also delivers companion hardware with the Matt85™ and Matt77™ direct thermal label printers and Android tablet, facilitating on-demand production of shelf-life, food rotation and complex grab & go product labeling.

Kitchen Automation Platform

Features and Benefits

- Accessible from any internet connection
- Shelf life, nutritional facts, allergen information and prep data can be organized, monitored and modified virtually anytime and anywhere
- Updates are securely and efficiently pulled in via the cloud
- Data changes can be communicated to staff at all locations immediately
- Video and recipe data can be uploaded at a central location and automatically shared with all connected store locations
- Provides a comprehensive overview, including announcements, account metrics and number of users currently using the platform
- Allows users to print labels wirelessly
- Eliminates the need to make costly repairs and maintain labor-intensive repair depots
- MenuPilot® is available on Android and iOS tablets
- The Matt85™ prints die-cut labels while the Matt77™ printer offers continuous-feed labeling

Complete Food Labeling System
