L/XL	IT1 19575

Touchscreen capability in the index and thumb fingertips

On average an employee should replace disposable gloves every 2 hours to avoid cross contamination. A minimum of 5 pairs of disposable gloves could be used per employee, per shift.

*Note: the cost of disposable gloves is growing more than 40% as of June 2020. ROI calculated based on the current cost of 100 pairs of disposable gloves/box.

Features & Benefits

- **Microban® antimicrobial fabric** helps to stop the spread of germs.
- **Touchscreen capability** in the index and thumb fingertips makes the gloves ideal when working with POS systems and smart devices.
- **Machine washable** for continued wear provides the ability to allocate the use of disposable gloves, which may be in limited supply.
- **Breathable and lightweight** 13-gauge knit fabric provides dexterity to perform everyday tasks.
- **Great for use in a variety of industries:** restaurants, grocery, convenience stores, retail establishments, banking, airline, fitness centers, education, and in-home repair service.
- **Made in the USA**
